

# Assessment and feedback in training and teaching

ELIXIR-GOBLET Train-the-Trainer - Session 4

Sebastian Petters, University of Tromsø

03 May 2024

1

DIVERSITY

3

FOSTER  
TRUST AND  
COLLABORATION

2

ACT ETHICALLY  
AND WITH  
INTEGRITY

4

RESPECT  
AND SHOW  
COURTESY TO  
EACH OTHER

# Welcome to the Session 4 of Train-the-Trainer (Organised by ELIXIR Norway)

We follow ELIXIR  
code of conduct

Use the chat function  
for questions

Mute yourself while  
not speaking

Use the 'hand up'  
function if you want  
to contribute directly

# Recap from Session 3

Write in the shared notes:

From the list

- Which of the tips and ideas do you apply or have you applied in teaching?
- Which would you like to apply in the future and why?

# Assessment and feedback

**Assessment  
vs  
Feedback**

## Teaching goal

Develop an understanding of **different types of assessment and feedback**, **when** to give and receive feedback, and for which **purpose**.

## Learning outcomes

- **Describe** the differences between formative and summative assessment
- **Explain** why frequent feedback is important
- **List** and **describe** a few techniques for formative feedback

**Key:**

Shared notes

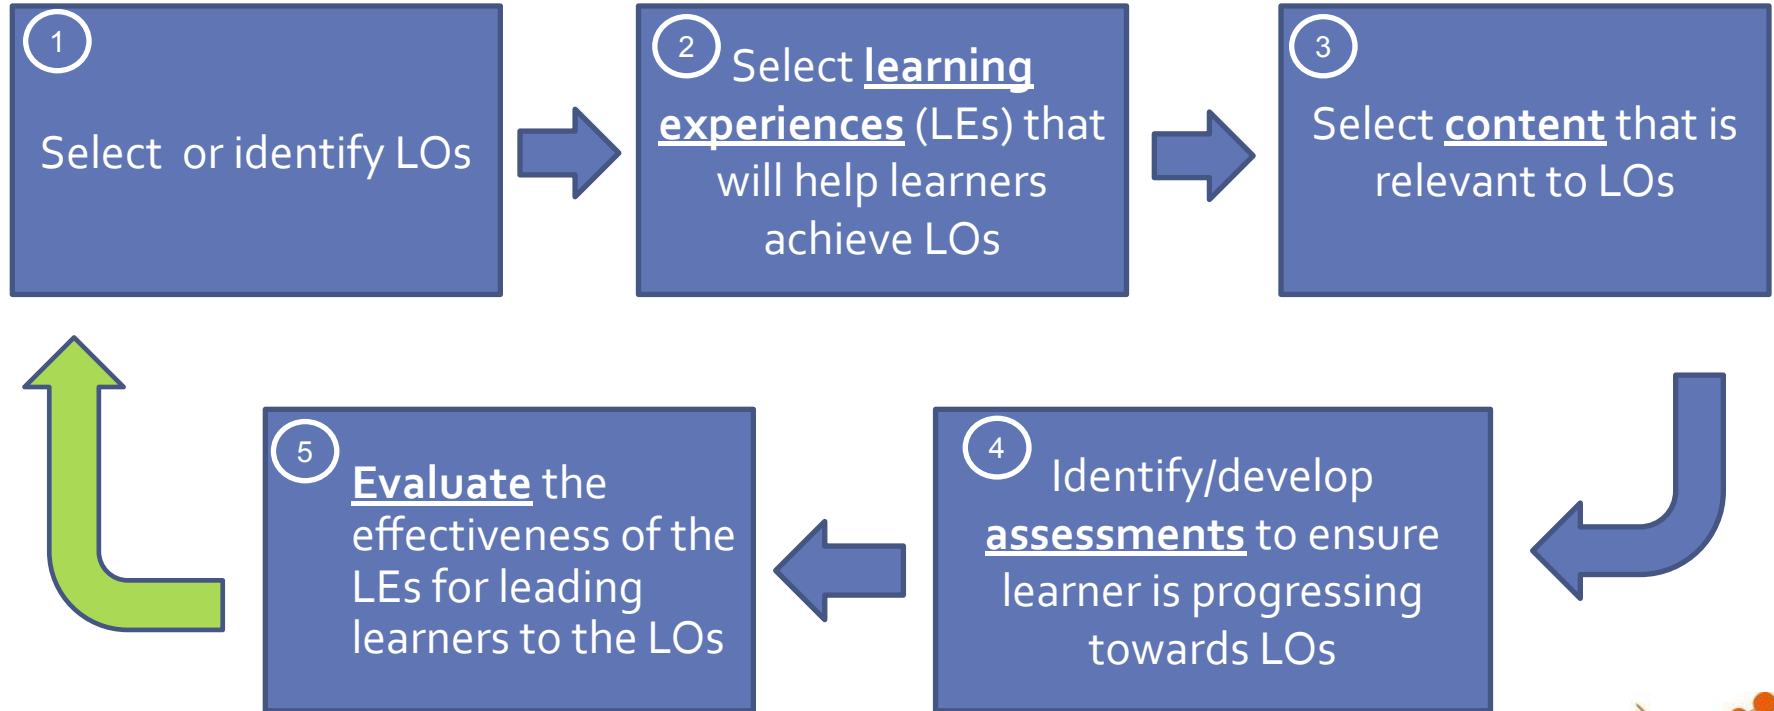

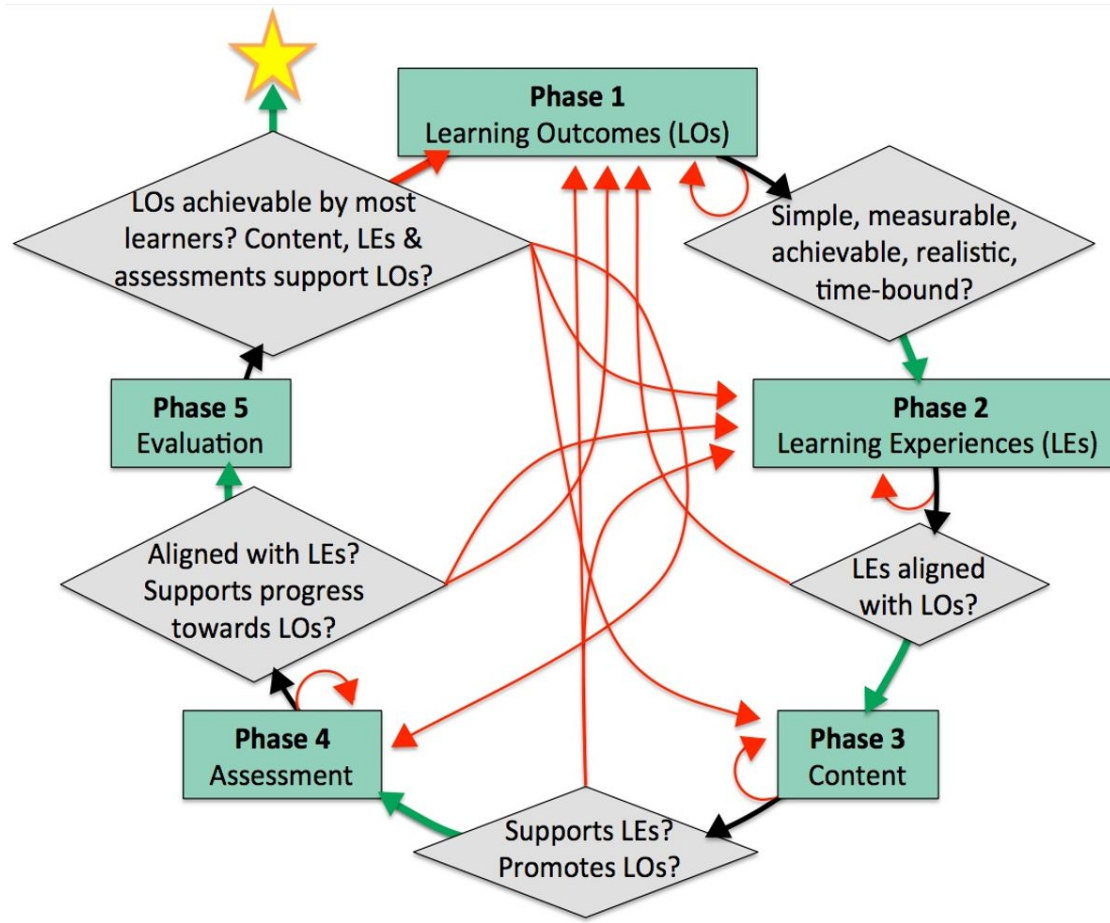

Break time

Group Activity  
(Breakout room)

# Instruction design in five steps

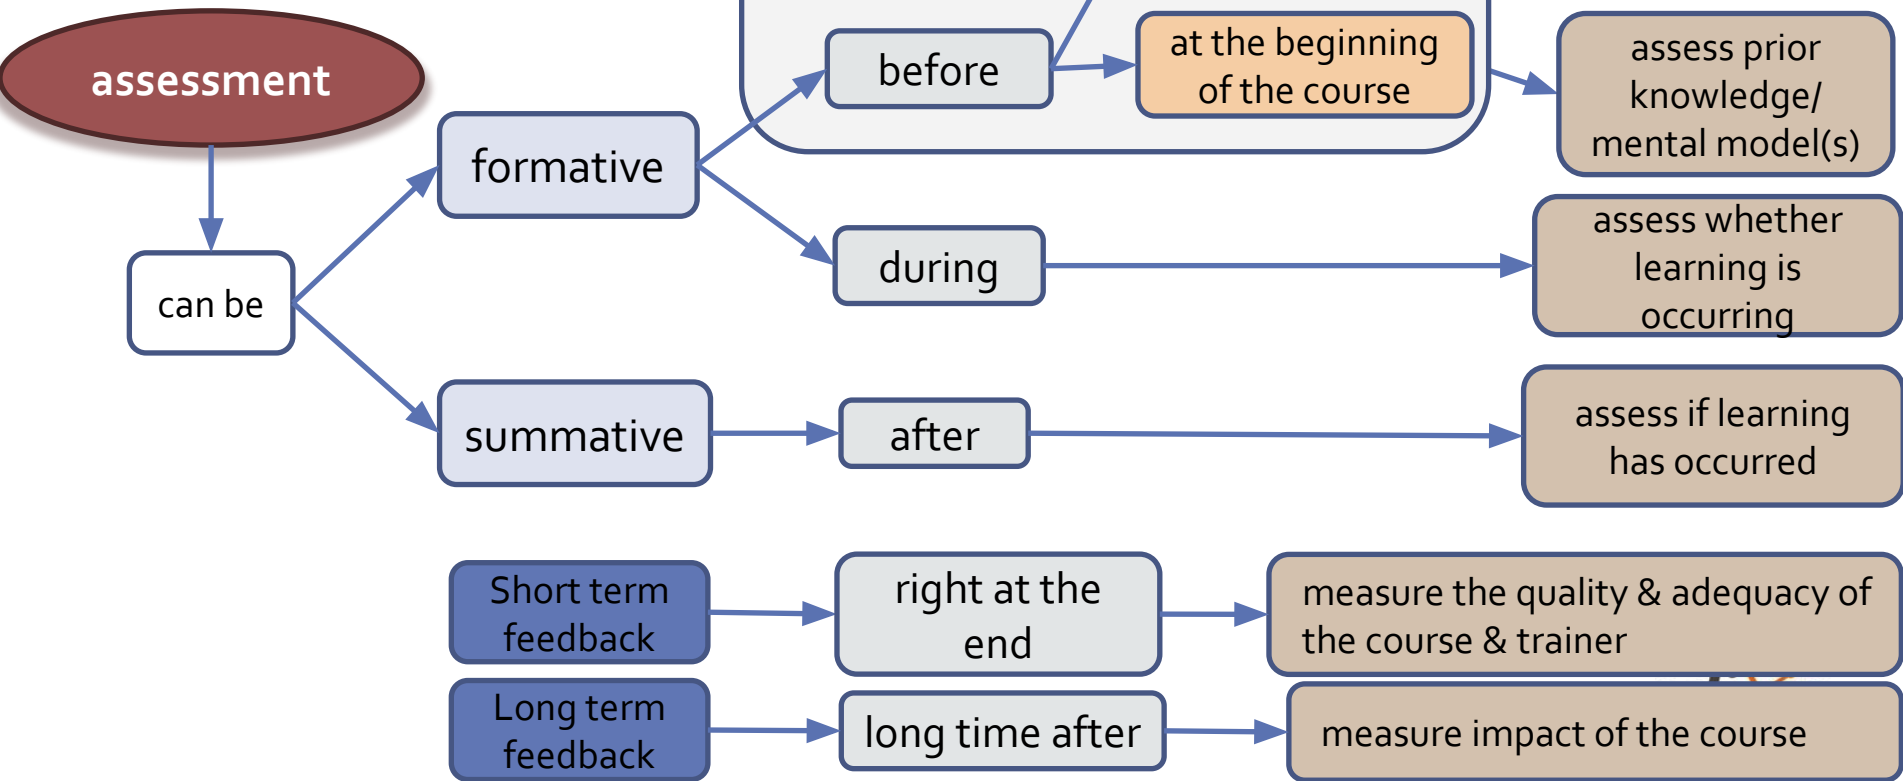

There are different types of assessment and different ways that we can categorise them

## One categorisation: related to the time of the course

## Challenge 4.1 - Diagnostic Assessment

8 min

- In groups, discuss how you could collect information (prior experience) from learners before/at the beginning of a course or lesson and how you can use it.
- Write it in the Shared notes for session 4

BREAK (5 min)

# Formative vs. Summative assessment

## Formative:

- **during** teaching and learning
- **improve the quality of students' learning**

## Summative:

- **at the end of** teaching and learning
- **evaluate learners' learning**

# FORMATIVE SUMMATIVE

WHEN THE CHEF  
TASTES THE SOUP

WHEN THE GUESTS  
TASTE THE SOUP

@bryanMathers

FROM STEVE WHEELER'S BLOG "THE AFL TRUTH ABOUT ASSESSMENT"

# Summative assessment - methods

1. Questionnaires
2. Interviews
3. Observations
4. Testing
5. Projects

Exam by [Nick Youngson](#) CC BY-SA 3.0 Alpha Stock Images

but in training the focus is on formative assessment

# Formative assessment

- Goals and objectives
- Prior knowledge
- Mental models
- Frequent mistakes
- Ability to perform a task

*“When implemented well, formative assessment can effectively double the speed of student learning (Dylan Wiliam, 2007).”*

## Challenge 4.2 - Formative Assessment (8 min)

- In Challenge 4.1, we discussed how to collect information on learners' prior knowledge.
- Now, in groups, discuss how you could collect information on learners'
  - mental models
  - goals and objectives
  - frequent mistakes

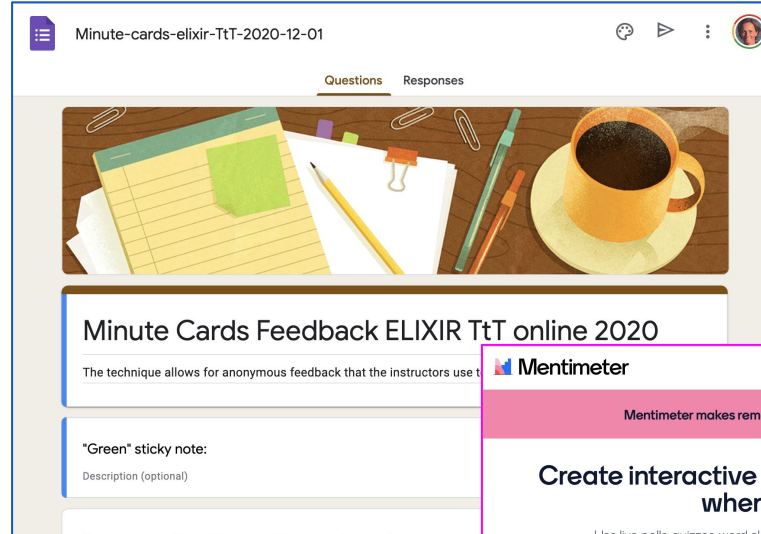

Write an example for each item in the GDoc

## Best teachers ...

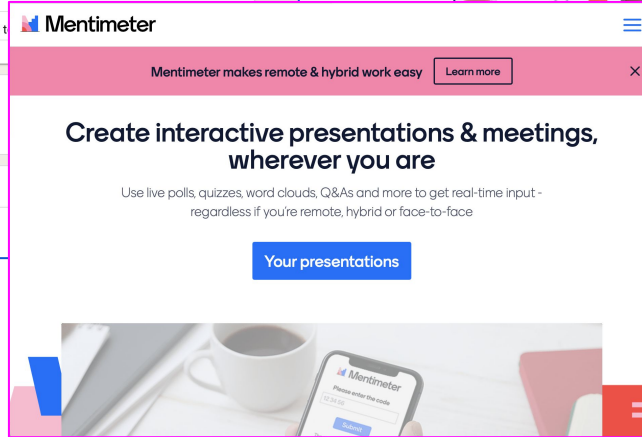

Constantly **monitor** what is happening to students  
**as they set about** learning and investigate when things do  
not **proceed as planned** or expected

Formative assessment & feedback to learners can be done in many different ways

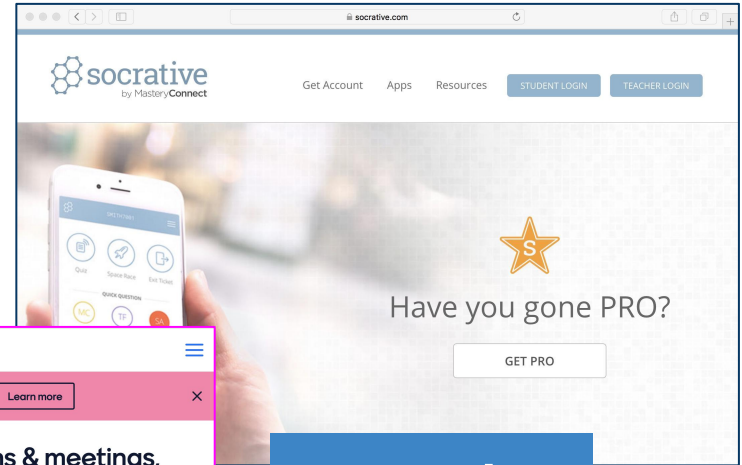

# Questionnaires / minute cards / Multiple Choice Questions

Google Forms

Mentimeter

Socrative

# Multiple Choice Questions and mental models

Q: what is  $27 + 15$  ?

- a) 42
- b) 32
- c) 312
- d) 33

The correct answer is 42, but each of the other answers provides valuable insight.

## Challenge 4.3 - Multiple Choice Questions (3 + 5 min)

Q: what is  $27 + 15$  ?

a) 42

b) 32

c) 312

d) 33

In groups, choose one **wrong** answer and write in the GDoc which **misconception** is associated with that wrong answer.

<https://carpentries.github.io/instructor-training/02-practice-learning/index.html>

# Group activities

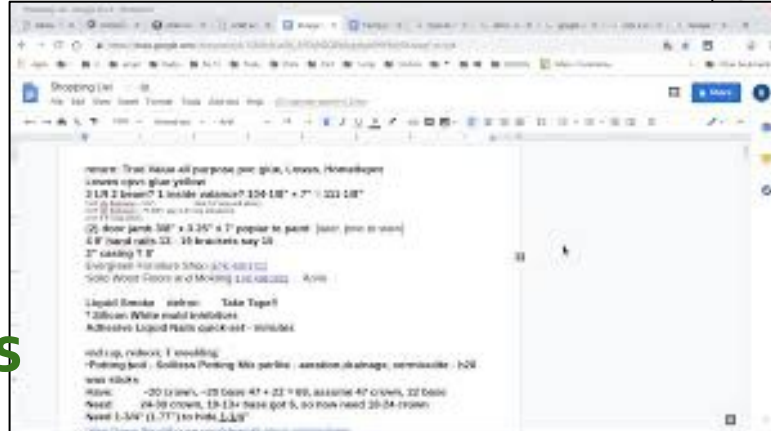

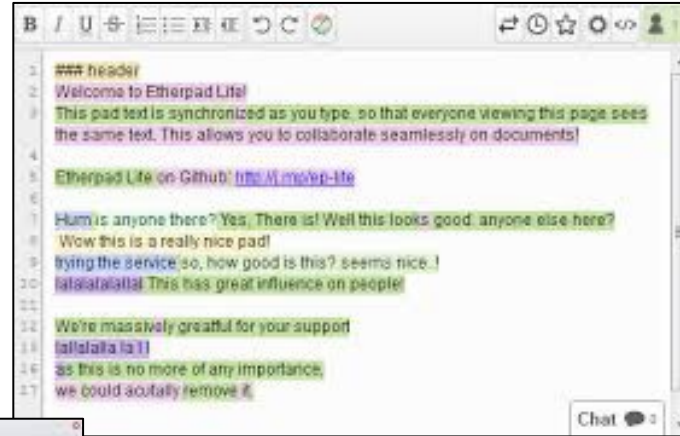

- Solve problems in groups
- Do exercises in front of the class
- Asking to describe the strategy they would adopt to solve a problem

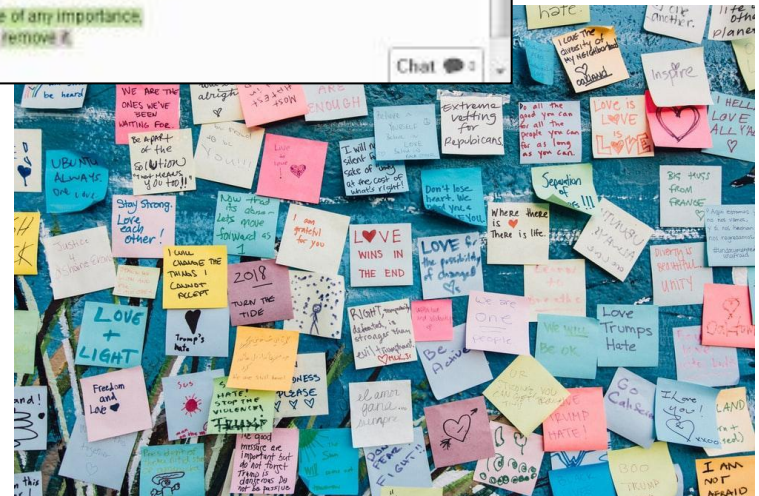

# Shared notes

# etherpad

- Output of group activities
- Exercises
- Opinions & Ideas & Comments & Thoughts
- Questions & Answers

# GDocs

# Asking questions & discussions

# Brainstorming & concept maps

# Self evaluation & peer evaluation

## Challenge 4.4 - How to integrate the result of formative assessment / feedback in your course (5 min)

- Individually think about this course:
  - how we (instructors) assessed your learning - write some examples in the Gdoc
- Choose one of the techniques to collect feedback given in the previous slides, and describe in the Gdoc how you can integrate the result in your lesson, on the fly

BREAK (5 min)

## Challenge 4.5 - How frequent should formative feedback be? (3 min)

- Individually: Think about this course: how many feedback opportunities have you had so far?
- How frequent do you think formative feedback should be? Write in the Gdoc

# Formative assessment should be frequent

- Ideally every 5 min
- At least every 10-15 min
- Attention span: 10-15 min
- Refocus attention

Receiving feedback from learners about  
our teaching efforts

# Example of Receiving Feedback: Minute cards

*Name one positive  
thing about the  
workshop so far*

*Name one thing  
about the workshop  
that could be  
improved*

## *Online minute cards*

Minute-cards-elixir-TtT-2020-12-01

Questions Responses

**Minute Cards Feedback ELIXIR TtT online 2020**

The technique allows for anonymous feedback that the instructors use to improve the quality of this workshop.

"Green" sticky note:  
Description (optional)

Name one positive thing about the workshop so far:

# Feedback is hard

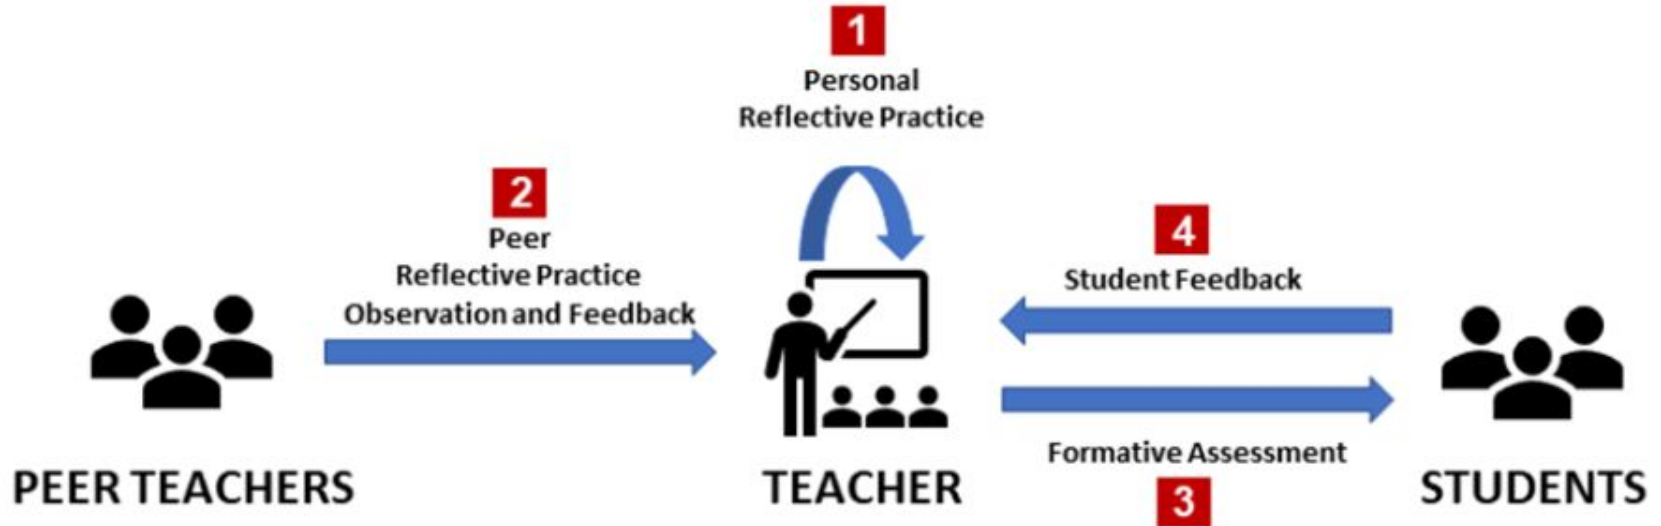

# Dealing with (bad) feedback

- Humans focus more on negative feedback than on positive (you are not alone)
- **Breathe deeply**
- Try to see the point in the criticism, **learn from it**
- **Don't take it personally**

# Dealing with (bad) feedback

- Review what they have effectively learned (in exams)
- Consider your own experience of teaching
- Discuss with colleagues and friends
- Look at the feedback from past sessions of the same course
- Look at the response rates
- Look at the counter examples (contradictions)
- Look at the repetitive patterns (not at only one single answer)

# Triangle - feedback about teacher's efforts

# Learn and teach others how to give good feedback

# Combining the 4 sessions

## Challenge 4.6 - Pick a learning experience and discuss how the 8 principles and the 6 strategies apply

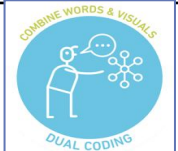

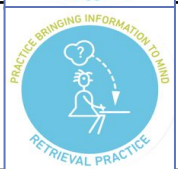

- Work in groups
- Carefully read the 8 principles and 6 strategies as a group
- Each group will pick one learning experience of your choice
- Discuss
  - What principles are involved here?
  - What strategies? and how do they facilitate learning?

# 8 Evidence Based Learning Principles

- P1: Students' **differences** influence their world view, their learning, and their performance.
- P2: **Prior knowledge** can help or hinder learning.
- P3: The **organization of knowledge** influences how students learn and apply what they know.
- P4: **Motivation** determines, directs, and sustains what students do to learn.
- P5: To develop **mastery**, students must:
- acquire **component skills**
  - practice **integrating** them
  - know when to **apply** what they've learned
- P6: **Goal-directed practice** with **targeted feedback** enhances the quality of learning.
- P7: The **classroom environment** we create profoundly affects learning, positively or negatively.
- P8: To become self-directed learners, students must learn to **monitor and adjust** their approaches.

Learning strategy		Description
Spaced practice		Creating a study schedule that spreads study activities out over time
Interleaving		Switching between topics while studying
Elaboration		Asking and explaining why and how things work
Concrete examples		When studying abstract concepts, illustrating them with specific examples
Dual coding		Combining words with visuals
Retrieval practice		Bringing learned information to mind from long term memory

# Thank you for your participation

Kindly fill out evaluation form

# Thank you!
